

VAMSHIDHAR REDDY

SUMMARY

Frontend Developer with 4+ years of experience in designing, developing, and maintaining responsive web applications. Skilled in Angular, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, and Bootstrap. Experienced in building reusable UI components, integrating RESTful APIs, implementing responsive designs, and optimizing web application performance. Hands-on experience developing Learning Management System (LMS) features using Angular 17 and .NET Web API. Strong understanding of cross-browser compatibility, UI development, and maintainable frontend architecture.

WORK EXPERIENCE

Frontend Developer , Audree Infotech

Dec 2024 - Aug 2026

- Developed and maintained responsive web applications using Angular and JavaScript, improving UI performance by 15%.
 - Integrated RESTful APIs to support dynamic data rendering and frontend-backend communication.
 - Implemented reusable UI components to improve code maintainability and reduce development time by 20%.
- Optimized application performance and ensured cross-browser compatibility.

UI Developer, Coa Network Pvt Ltd

Sep 2021 - Nov 2024

- Developed responsive, mobile-friendly websites using HTML5, CSS3, Bootstrap, and JavaScript.
 - Converted HTML templates into customized WordPress themes.
 - Resolved UI issues and improved cross-browser compatibility across web applications.
 - Worked on Chrome extension projects, including Bullhorn and JobDiva.
 - Troubleshoot and resolved frontend issues using JavaScript.
-

PROJECTS

Learning Management System (LMS)

- Designed and developed a full-featured Learning Management System (LMS) to manage courses, users, and learning progress.
- Built a responsive frontend using Angular 17, implementing modular architecture, lazy loading, and reusable components.
- Integrated backend services using .NET Web API for authentication, course management, and user roles.
- Developed features such as course enrollment, video lessons, quizzes, progress tracking, and certificates.
- Ensured optimized performance, secure API communication, and mobile-first UI design.

iTeleCenter

- Developed an easy-to-use virtual phone system tailored for small businesses, seamlessly converting smart phones and computers into a fully functional business phone system.
- Enhanced system usability to increase productivity and efficiency for small business owners.
- Utilized technologies such as HTML5, CSS3, Bootstrap5, and JavaScript to enhance system functionality and user experience.
- URL: <https://www.itelecenter.com>

React Quiz Application

- Developed an interactive quiz application using React, providing users with an engaging and educational experience. The app dynamically generates quiz questions and tracks user responses in real-time.
- Dynamic Quiz Questions: Leveraged the useState hook to manage the state for quiz questions and user responses, enabling dynamic updates to the UI based on user interactions..
- Real-time Feedback: Utilized useEffect to handle side effects, such as calculating scores and updating the UI with real-time feedback as users answer questions.
- Responsive Design: Implemented a fully responsive layout using CSS, ensuring a seamless experience across various devices

EDUCATION

B.Tech – Computer Science Engineering

Malla Reddy Institute of Engineering & Technology

Percentage: 60%

ADDITIONAL INFORMATION

- **Technical Skills:** Angular 17, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3
- **UI Frameworks:** Bootstrap, Responsive Web Design
- **API Integration:** RESTful APIs, .NET Web API
- **CMS:** WordPress, WordPress Theme Development
- **Development Practices:** Reusable Components, Cross-Browser Compatibility, Performance Optimization
- **Languages:** English, Hindi, Telugu
